

Body Guard is formulated from the finest deep-sea shark liver oil to provide maximum protection against oxidative stress, boost the immune system, and promote cardiovascular health.

Few things are certain in life, but one certainty is that we all age. Everyone wants to slow the aging process because it results in a variety of health concerns. Researchers are finding that the main cause of aging is oxidative stress. This can be likened to the rusting of a car as it ages. Oxidative stress can result from both internal and external factors. Internally, our bodies generate energy, and 75 percent of this energy is in the form of heat calories. This heat causes oxidative stress to degrade the cell membranes of our body tissues. Externally, sunlight, pollution, and even the food we eat can increase the oxidative stress on our bodies.

Researchers have now found that one of the best methods of protecting yourself from oxidative stress is by supplementing with shark liver oil. Shark liver oil is obtained from sharks, caught for food purposes only, living in cold, deep oceans. Shark liver oil is rich in vitamins A and D and in essential omega-3 fatty acids.

Shark liver oil is also rich in alkylglycerols (AKG), which are naturally found in mother's milk and in bone marrow. Alkylglycerol is a family of compounds that plays a vital part in the production and stimulation of white blood cells. It is found in freshwater fish, and in cow, sheep and mother's milk. AKGs are one of the active substances that give breast-fed babies crucial protection against infection until the infants' own immune systems are fully developed. AKGs are found in greater concentration in the liver of the deep-water shark than any other place on earth.

Supplementing your diet with AKGs, in the form of shark liver oil capsules, seems to elevate the nonspecific immune response by causing an increase in the level of white blood cells that work for the body's immune system.*

Item No. SU74090 | 60 Gel caps

Benefits

- Provides optimal antioxidant protection to cell membranes*
- Maintains cholesterol levels already within the normal range*
- Decreases platelet aggregation and helps inhibit blood clot formation*
- Promotes vasodilatation*
- Increases elasticity of arterial walls*
- Maintains healthy mucous membranes (lungs) and skin*
- Enhances immune system response*

Instructions

Body weight determines the amount to be taken. Children under 80 lbs. need 1 capsule daily. Adults under 160 lbs. use 2-3 capsules daily. Adults over 160 lbs. use 4 capsules daily.

As with any nutritional product, please consult your physician before use, especially if pregnant, lactating, or have a known medical condition.
